Introduction

The following research report is a statistical description of offenders released to the streets from Massachusetts pre-release facilities during 1982 with corresponding recidivism rates. For the purposes of this report, maximum, medium and minimum security institutions are collapsed into the "non-pre-release" category. An earlier report provided (Publication #274) the information for all the specific higher security facilities. The statistics are available for men released from MCI's Walpole, Concord, Gardner, Norfolk, SECC (Southeastern Correctional Center), NCC (Northeastern Correctional Center), Bay State Correctional Center, Plymouth, and Warwick; three drug contract programs (Meridian House, Boston VA Hospital, and Third Nail); and twelve pre-release centers (577 House, Coolidge II, Temporary Housing, Shirley, Boston State, Coolidge, Brooke, South Middlesex, Park Drive, Lancaster, Hillside, and Norfolk Pre-Release). Statistics are also available for women released from MCI-Framingham, two pre-release centers

(Lancaster and Brooke House) and one other facility (Lemuel Shattuck Hospital). A total of 1,221 offenders (918 males and 303 females) were released from the correctional facilities listed above. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail for 30 days or more and includes parole violators as well as those offenders sentenced for new crimes.

Information contained in this report includes statistics on recidivism rates associated with individual characteristics with regard to release variables, nature of present offense variables, personal background variables, criminal history variables, furlough participation variables, and release follow-up variables. The tables which follow contain two types of information: (1) statistical data describing characteristics of offenders released from each institution during 1982 and (2) the rates of recidivism cross tabulated with each of the categories of the statistical data for these offenders.

In reading tables in this report, the reader should note the following: (1) the release population is divided according to the institution of release; (2) N represents the number of offenders who fall into the corresponding category in the table; (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents); and (4) RR (Recidivism Rate) represents the recidivism rate of the number of offenders in that category who have recidivated. For example, upon referring to the first table on page 8, the variable "Type of Release" is presented and the following kinds of information may be

obtained: (1) the total number of releases broken down by specific institution is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 1,221 offenders released during 1982, 921 were released on parole (75%) and 300 were released on a discharge (25%); and (4) those offenders released from Shirley who were released on parole had a recidivism rate of 21% while those offenders released from Shirley on a discharge had a recidivism rate of 7%.

The material was derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and was produced on the Massachusetts State College Computer Network (MSCCN).
