## Abstract

This report is a statistical description of the 2,409 individuals committed by the courts to a term of incarceration in the Massachusetts Department of Correction during the year 1985. The tables in this report contain information on the nature of present offense, personal background characteristics and criminal history of these individuals. Some highlights of the statistics presented in this report are:

- There was an 9 percent increase in the number of commitments during the year, from 2,202 in 1984 to 2,409 in 1985. This is a similar increase to that which occurred in 1984 (8 percent) and continues a period of growth in court commitments. The 2,409 commitments in 1985 represents the highest level of commitments in DOC history.
- There were 993 commitments to Cedar Junction (20 percent higher than 1984), 617 commitments to Concord (a slight drop from 1984) and 799 commitments to Framingham (9 percent higher than 1984).
- Males are committed to Cedar Junction or Concord while females are committed to Framingham. Overall, there was a 10 percent increase in male commitments and a 9 percent increase in female commitments from 1984 to 1985.
- The median minimum sentence for Cedar Junction commitments was five years; the median maximum sentence for Concord commitments was ten years; and the median maximum sentence for Framingham commitments was less than 1 year. Sentence lengths for new court commitments were similar in 1984 and 1985 for Concord and Framingham commitments, but the median for Cedar Junction commitments declined from six to five years.
- Violent offenses (person and sex) accounted for 62 percent of all male commitments and 11 percent of all female commitments. Non-violent offenses (property, drug and "other") represented 89 percent of all female commitments and 38 percent of all male commitments. Armed robbery was the single most common offense. The largest increases in commitments from 1984 to 1985 were in categories of drug offenses (98 more in 1985 than 1984) and sex offenses (84 more in 1985 than 1984).
- The median age at commitment was 26.8 years, slightly higher than in 1984 (26.3 years).
- Sixty-one percent of the commitment population were whites; 65 percent were single; 11 percent had been in the military; 48 percent came from the Boston SMSA; most had limited work experience concentrated in the areas of manual labor and services; the median educational level was eleventh grade; and 23 percent had a self-reported history of drug use.
- Fifty-six percent were serving their first adult incarceration. The median age at first court appearance was seventeen.

### Introduction

This report is a statistical description of individuals committed by the courts to the Massachusetts Department of Correction during 1985. The tables in this report contain information on the nature of the present offense, personal background characteristics and criminal history of admissions from the courts. The information on which this report is based was prepared by the Operations Research Unit of the Research Division.

This report includes all new court commitments as well as those who began serving a new sentence during the year (forthwith and from and after sentences). If an individual was committed to the Department more than once during 1985 that individual is counted as multiple court commitments. Some categories of offenders are not included in this report, for example, those who began serving "B" and "C" sentences during 1985 (sentences received for crimes committed on parole).

The following information is helpful in reading the tables in this report. Each table is divided according to committing institution. Since each committing institution receives a very different type of offender, it is important to consider each column in the table as well as the total column. The top number in each cell represents the number of individuals who fall into the corresponding category in the table. The bottom number in each cell appears in parentheses and represents the percentage of the number of individuals in a particular category to the total number of commitments from that institution (column percents).

Cases where information is unknown are also included in the tables and are included in the percentages. It is important to note the size of the "unknown" category. It is particularly large in some of the personal background characteristics variables (e.g. occupation and drug use).

### Number of Commitments

There were 2,409 commitments during 1985, a 9 percent increase from the previous year. Figure 1 (page 6) shows the number of commitments for the period 1974 to 1985. The number of commitments during 1985 was higher than at any time in the history of the DOC. The increase in commitments from 1984 to 1985 was only one percent larger than that of the previous year, but this is the seventh straight year in which commitments increased.

Individuals are committed to one of three institutions: Cedar Junction, Concord or Framingham (MCI-Walpole was renamed MCI-Cedar Junction in 1985). Figure 2 (page 6) shows the number of commitments to each committing institution for the period 1974 to 1985. The number of commitments during 1985 was higher than any of the preceeding eleven years for Cedar Junction and Framingham but showed a continuing decrease from the peak number of Concord commitments in 1982.

The increase in number of commitments was most dramatic for Cedar Junction, increasing from 827 in 1984 to 993 in 1985, an increase of 166 commitments or 20 percent. Framingham increased from 732 commitments in 1984 to 799 in 1985, an increase of 67 commitments or 9 percent. In contrast, commitments to Concord decreased by 26 or 4 percent. Overall, male commitments increased by 10 percent and female commitments increased by 9 percent.

**Figure 1**  
**Number of Commitments to DOC,**  
**1975 to 1985**

**Figure 2**  
**Number of Commitments to DOC,**  
**by Committing Institution**  
**1975 to 1985**

Almost all of the 9 percent increase in Framingham commitments came in the areas of property, drug and "other" offenses. Commitments to Framingham for property offenses increased from 270 in 1984 to 303 in 1985 (by 33 or 12 percent); commitments for drug offenses increased from 82 in 1984 to 96 in 1985 (by 14 or 17 percent); and commitments in the "other" category rose from 292 in 1984 to 313 in 1985 (by 21 or 7 percent). The increase in property offenses showed up primarily in larceny commitments (a gain of 26 or 25 percent). The increase in female drug commitments showed up in class A offenses (a gain of 7 or 23 percent). The increase in female "other" commitments was distributed among escapes (7 or 350 percent), disturbing the peace (9 or 12 percent) and motor vehicle offenses (8 or 11 percent). The increase in Framingham commitments occurred only among those women committed to county sentences. There were 653 women with county sentences (a maximum of two and a half years or less, including fines) committed in 1984 and 730 in 1985, an increase of 77. There were 69 women committed with state sentences in 1985 compared to 79 in 1984, a decrease of 10.

For male commitments, those committed to Cedar Junction or Concord, there was a 10 percent increase from 1984 to 1985. This increase occurred only for Cedar Junction commitments (by 166 or 20 percent) as Concord commitments actually declined by 26 or 4 percent. This increase occurred in three offense categories: sex, property and drug offenses. Commitments for sex offenses increased from 221 in 1984 to 252 in 1985 (by 31 or 14 percent); commitments for property offenses increased from 267 in 1984 to 318 in 1985 (by 51 or 19 percent); and commitments for drug offenses rose from 179 in 1984 to 263 in 1985 (by 84 or 47 percent). Commitments for person offenses declined by 16 (2 percent) and for "other" offenses declined by 9 (21 percent).

Thus, in 1985, commitments to the DOC continued to increase at virtually the same rate as that of the previous year. Increases were found for Cedar

Junction and Framingham commitments as Concord commitments declined slightly. The increase in female commitments was primarily among women serving county sentences and women committed for property, drug and "other" offenses. Among males, there was an increase in commitments for sex, property and drug offenses and a large increase in Cedar Junction commitments.

### A Description of 1985 Court Commitments

This section presents a general description of the population of individuals committed to the DOC during 1985. This discussion includes a description of the present offense, personal background characteristics and criminal history of the offender. Where appropriate, comparisons among the three committing institutions are done.

#### Nature of Present Offense

In discussing the present offense of the commitment group, only the most serious offense, the offense for which the person received the longest sentence, is considered.

Court of Commitment. Sixty-nine percent of the commitments to the Department of Correction were from Superior Courts. Four courts, Suffolk Superior, Middlesex Superior, Worcester Superior and Hampden Superior, accounted for 49 percent of the commitments to the Department. All Cedar Junction commitments came from Superior Courts and 92 percent of all Concord commitments came from Superior Courts. Only 10 percent of the commitments to Framingham were from Superior Courts; most commitments to Framingham were from municipal and district courts (municipal courts are lower courts of Suffolk

County and district courts are lower courts of all other counties with the exception of Brookline Municipal Court in Norfolk County).

**Jail Credits.** Jail credits measure the amount of the time that the individual spent incarcerated while awaiting trial. A large number of jail credits is usually indicative of a serious crime or a low income offender. Seventy-eight percent of Cedar Junction commitments had one or more days of jail credits. This contrasts with 63 percent of Concord commitments and 31 percent of Framingham commitments. The median number of days of jail credits for all commitments was eight.

**Minimum Sentence.** Only those individuals who received a state prison sentence (all Cedar Junction commitments and some Framingham commitments) received a minimum sentence. Generally minimum prison sentences must be for two and one-half years or more but in some cases can be shorter (some drug offenses carry short prison sentences, for example). The median minimum sentence for Cedar Junction commitments was five years. There were 23 commitments to Framingham who received prison sentences. The median minimum sentence for those women was four years. Sixty-one individuals received life sentences during 1985, including one woman.

**Maximum Sentence.** All individuals committed to the Department have a maximum sentence. For Concord commitments this is their only sentence. Generally maximum sentences to Concord are two and one-half years or longer but shorter sentences can be given for some offenses such as larceny, escape and drug offenses. The median maximum sentence for Concord commitments was ten years. A large proportion of Framingham commitments received county sentences, those with a maximum length of less than two and one-half years. Of the 799 commitments to Framingham, 23 (3 percent) received prison (Cedar Junction) sentences, 46 (6 percent) received reformatory (Concord) sentences and 730 (91

percent) received county sentences, including 71 committed for non-payment of a fine.

**Type of Sentence.** Most individuals committed to the Department received simple sentences (35 percent) or concurrent sentences (35 percent). Less frequently served are aggregate, forthwith or from-and-after sentences. Forthwith sentences are commonly found among Cedar Junction commitments (18 percent); split sentences are commonly found among Concord (19 percent) and Framingham (22 percent) commitments; and 9 percent of the Framingham commitments were in lieu of payment of a fine.

**Offense.** Type of offense varies by committing institution. Sixty-five percent of the commitments to Cedar Junction and 57 percent of the commitments to Concord were for violent offenses while 38 percent of commitments to Framingham were for property offenses and 39 percent were for offenses in the "other" category.

Offenses against the person accounted for 34 percent of all commitments to the Department but only 11 percent of the commitments to Framingham. Armed robbery accounted for 12 percent of all commitments. There were 133 commitments for homicides in 1985 including 26 for first degree murder, 29 for second degree murder and 78 for manslaughter.

Sex offenses accounted for 10 percent of all commitments to the DOC. There were 220 commitments for rape during 1985 and 29 commitments for assault with intent to rape. Of these offenses, 117 involved adults and 131 involved minors. Additionally there was 1 commitment for unnatural acts and 2 for other sex offenses during the year.

Property offenses accounted for 26 percent of all commitments to the Department, but 38 percent of the commitments to Framingham. Burglary was the most common property offense for Cedar Junction and Concord commitments;

larceny was the most common property offense for Framingham commitments.

Drug offenses accounted for 15 percent of all commitments during 1985. The most common drug offenses were violation of the controlled substance act with a Class B substance (N=136) or Class A substance (N=121). The Class B substance category includes amphetamines, cocaine, barbiturates, and other substances. The Class A substance category includes heroin.

Offenses in the "other" category accounted for 2 percent of Cedar Junction commitments, 2 percent of Concord commitments and 39 percent of Framingham commitments. The most common offenses in this category were prostitution (N=84), disturbing the peace (N=85), operating under the influence (N=81) and weapons offenses (N=27). The 9 offenses labelled "other" include accessory after the fact and attempt to commit a crime.

**Time Until Parole Eligibility.** An indication of how much time offenders will actually serve is the time until their parole eligibility date. About one-half of all offenders will be released at their original parole eligibility date. For Cedar Junction commitments the median time to serve was from 2 to 3 years; for Concord commitments the median time to serve was from 10 to 12 months; and for Framingham commitments the median time to serve was less than three months.

**Age At Incarceration.** The median age at incarceration was 27 years. The age of new commitments ranged from 15 years to 81 years. The median age of Cedar Junction commitments was 28 years; the median age of Concord commitments was 25 years; and the median age of Framingham commitments was 27 years.

## **Personal Background Characteristics**

In discussing the personal background characteristics of the commitment population, all information is reported according to the status of the offender at the time of commitment. Most of this information is self-reported by the offender and is not verified in any way.

**Sex.** All Cedar Junction and Concord commitments are males, all Framingham commitments are females. During 1985, 33 percent of the commitments were females and 67 percent were males.

**Race and Ethnicity.** Sixty-one percent of the 1985 commitment group were white, 27 percent were black and 11 percent were identified as hispanic. There were also 9 Native Americans and 4 Asians committed to the DOC. Thirteen percent of the commitment group were Hispanics. This includes white hispanics, black hispanics and hispanics whose race was otherwise not identified.

**Citizenship.** Ninety-seven percent of the commitments were U.S. citizens and 3 percent were citizens of other countries. Sixty-five percent of the commitments were born in Massachusetts, 21 percent were born in other states, 2 percent were born in other countries and 9 percent were born in U.S. territories.

**Marital Status.** Most of the commitment group were single (65 percent). Eighteen percent were married at the time of their commitment, 10 percent divorced, 6 percent separated and 1 percent widowed.

**Military History.** Ten percent of the commitment group had a history of military service. Seventy-six percent of the known veterans were honorably discharged from military service.

**Prior Address.** Almost all commitments were living in Massachusetts prior to incarceration. Four counties (Suffolk, Worcester, Middlesex and Hampden) accounted for 70 percent of all commitments.

**Occupation.** Most of the individuals committed to the Department had previous work experience. This work experience was concentrated in the areas of manual labor (49 percent) and services (27 percent). The median length of tenure in a position was 1 to 2 years.

**Education.** The median educational level for this population was eleventh grade. Fifty percent of the commitment group had completed at least high school, including 12 percent with some college education.

**Drug Use.** Twenty-three percent of the commitments reported a history of prior drug use; 8 percent reported a history of heroin use. Drug use history was generally based on offender self-reports or criminal history.

### **Criminal History**

Information about the criminal history of individuals committed to the DOC is taken from reports prepared by the Board of Probation and records submitted by District Courts. These reports identify the number of court appearances and the offenses that the individual was charged with as well as disposition information. In this section the individual's history of court appearances, charges, incarcerations and paroles will be discussed.

**Prior Court Appearances.** The median number of prior court appearances was ten. Seventy percent had court appearances for person offenses, 77 percent for property offenses, 16 percent for sex offenses, 49 percent for narcotics offenses, 23 percent for alcohol offenses and 9 percent for escape offenses.

**Prior Incarcerations.** Fifteen percent had a history of commitment to a juvenile authority; 31 percent had a history of incarceration in a county facility; and 22 percent had a history of incarceration in a state or federal facility. Fifty-six percent were serving their first incarceration as an adult.

**Parole History.** The number of paroles and parole violations that an individual experienced prior to this commitment are shown on pages 57 to 62. About 13 percent of the commitment group experienced paroles in the past. Fifty-one percent of those with a history of paroles also had one or more parole violations.

**Age at Entry Into Criminal Justice Systems.** Age of the individual at his/her first court appearance and his/her first court appearance for a drug related offense or for an alcohol related offense are shown on pages 63 to 65. The median age at the time of first court appearance was 17 years of age.
