INTRODUCTION

The following report is a statistical description of characteristics of inmates released to the street from Massachusetts Correctional Institutions during 1975 with corresponding recidivism rates. These statistics are available for men released from MCI's Walpole, Concord, Norfolk, Framingham; the three Forestry Camps (Plymouth, Monroe, and Warwick); and eight pre-release centers (The Third Nail Drug Rehabilitation Facility, 699 House, Temporary Housing, Shirley, Boston State, Coolidge House, Brooke House, and Roxbury Community Rehabilitation Center). Statistics are also available for women released from MCI Framingham and Charlotte House Pre-Release Center. A total of 806 individuals (711 men and 95 women) were released from the MCI's listed above. The follow-up period is for one year from the date of the individuals release to the community. A recidivist has been defined as any person who returns to a state or federal correctional institution or to a house of correction or jail for 30 days or more.

The information contained in these tables is currently being used to construct updated base expectancy prediction tables as well as Salient Factor Analysis Prediction devices. However, before the final completion of these studies, statistics on recidivism rates will be presented in this report as well as inmate characteristics with regards to institution release variables, history of present offense variables, personal background characteristics, criminal history variables, furlough variables and release follow-up variables.

The tables which follow contain two types of information: (1) statistical data describing the characteristics of inmates released from each MCI in 1975; and (2) the rates of recidivism cross tabulated with each of the categories of the statistical data for these individuals. In reading the tables in this report, the reader should note the following: (1) This release population is divided according to the institution of release, (2) N represents the number of individuals who fall into the corresponding category in the table, (3) P represents the percentage of the number of individuals in a particular category to the total number of individuals released from that institution, and (4) RR (Recidivism Rate) represents the rate of recidivism of the number of individuals in that category who have recidivated.

For example, upon referring to Table I on page 2, the variable, "Type of Release", is presented and the following kinds of information can be obtained: (1) The total number of individuals broken down by the institution from which they were released. This is labeled and presented horizontally across the head of the table. (2) The type of release-parole or discharge-is labeled and presented vertically. (3) Of the 806 individuals released in the year 1974, 125 were released from MCI Walpole. (4) Of the 125 individuals released from Walpole, 92 (74%) were released on parole and 33 (26%) were released on a discharge. (5) Those individuals released from Walpole on a parole had a recidivism rate of 32%, whereas those individuals released from Walpole on a discharge had a recidivism rate of 15%.
