A DESCRIPTION OF THE RESIDENTS OF MASSACHUSETTS
CORRECTIONAL INSTITUTIONS ON JANUARY 1, 1973

Massachusetts Department of Correction

Joseph J. Higgins
Acting Commissioner

August, 1973

Produced by:

Correction/Parole Information
System Project

(Report prepared by Robert Patrician)

The tables which follow describe the populations of the Massachusetts Correctional Institutions (MCI's) at the beginning of 1973. They are derived from a computerized data base developed by the Correction-Parole Information System Project.

The primary function of this report is to serve as a reference document answering specific questions about the current populations of the MCI's. For example: How many residents are from the Boston area? How many Concord men were committed for drug offenses? How many Norfolk men are beyond their first parole eligibility date? The secondary function of the report is to serve as an educational tool giving a summary description of the population of the whole Department, and of each institution.

The information system from which this report was produced has been developing over the last year and a half. Its general purpose is to provide decision-makers, planners and researchers with readily accessible data to meet their information needs. More specifically, its purposes are to produce periodic statistical reports describing residents and parolees and population movements, to respond to specific information requests, and to produce lists of residents eligible for particular programs. Our first step in this direction has been the development of files of basic data about current residents and parolees. This has involved:

- (a) collecting some 40 variables at the point of admission to prison and an additional 15 variables at the point of admission to parole, and
- (b) maintaining information on the "current" resident population by continually changing the data base as people are committed from the courts, transferred in and out of MCI's for various reasons, and released to the streets. Thus reports such as the present one will periodically be produced in the future.

Separate columns of the tables in the report describe the population of each MCI, and of the total. Residents of Bridgewater are excluded,

with the exception of those transferred to Bridgewater from other MCI's during 1972. The specific tables contained in the report are as follows:
