F. Disposition of New Arrest	47
VIII. Glossary	48

Introduction

The following research report is a statistical description of characteristics of individuals released to the streets from Massachusetts Correctional Institutions during 1979 with corresponding recidivism rates. The statistics are available for men released from MCI's Walpole, Concord, Framingham, Norfolk, SECC (Southeastern Correctional Center), Minimum Security (Northeastern Correctional Center, Bay State Correctional Center, Plymouth and Warwick), six drug programs (Concilio, Sharp, Spectrum House, Meridian House, Center for Attitude Change, and Boston VA Hospital), thirteen pre-release centers (577 House, 699 House, Temporary Housing, Shirley, Boston State, Coolidge, Brooke, South Middlesex, Park Drive, Western Avenue, Lancaster, Charlotte House, and Norfolk Pre-Release), and two other facilities (RDC-Reception Diagnostic Center and Lemuel Shattuck Hospital). Statistics are also available for women released from MCI-Framingham and three pre-release centers (Charlotte House, Brooke House, and Lancaster). A total of 1,053 individuals (932 males and 121 females) were released from the correctional facilities listed above. The follow-up period is one year from the date of the individual's release to the community. A recidivist is defined as any person who returns to a state or federal correctional institution, or to a

house of correction or jail for 30 days or more.

Information contained in this report includes statistics on recidivism rates associated with individual characteristics with regard to release variables, nature of present offense variables, personal background characteristics, criminal history variables, furlough participation variables, and release follow-up variables. The tables which follow contain two types of information: (1) statistical data describing characteristics of individuals released from each correctional facility during 1978; and (2) the rates of recidivism cross tabulated with each of the categories of the statistical data for these individuals.

In reading tables in this report, the reader should note the following: (1) the release population is divided according to the institution of release. (2) N represents the number of people who fall into the corresponding category in the table. (3) P represents the percentage of the number of individuals in a particular category to the number of individuals released from that institution (column percents). (4) RR (Recidivism Rate) represents the rate of recidivism of the number of individuals in that category who have recidivated.

For example, upon referring to the first table on page 9 , the variable "Type of Release" is presented and the following kinds of information may be obtained. (1) The total number of releases broken down by the institution or security level of release is labeled and presented horizontally across the head of the table. Note: the sum of the totals for each institution will not equal the total of 1,053 under the Total column. The Total

column includes four individuals released from RDC and Lemuel Shattuck. (2) The type of release (parole or discharge) is labeled and presented vertically. (3) Of the 1,053 released during 1979, 921 were released on parole (87%) and 129 were released on a discharge (13%). (4) Those individuals released from Walpole released on a parole had a recidivism rate of 32%, whereas those individuals released from Walpole on a discharge had a recidivism rate of 28%.

The material was derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and was produced on the Massachusetts State College Computer Network (MSCCN).
