INTRODUCTION

The tables which follow describe the population of the Massachusetts Correctional Institutions (MCI) at the beginning of 1975. They are derived from the computerized data base developed by the Correction and Parole Management Information System and were produced by the Operations Research Unit of the Research Division.

This report is intended to give a broad over view of the institutional population in Massachusetts. It is intended to be used as a basic reference document to answer specific sorts of questions, such as: how many residents were less than eighteen years of age at commitment, what percentage of the Norfolk population is from the city of Worcester.

On the other hand, these tables are not expected to answer all information needs. We in the Operations Research Unit are available to further analyze this and other data to answer more detailed requests. We do hope, however, that this report will give departmental personnel an idea of what information is available so that we may better meet informational needs.

A computer printout can be very confusing especially to the uninitiated. The following pointers are intended to ease the use and understanding of these tables. Please refer to Table 1 (which begins on page2).

1. Each table is a crosstabulation of a variable against current institution. Current institution is defined as that MCI in which a resident was incarcerated on January 1, 1975.
2. At the top of each table is a banner listing the variables contained in the table. Table 1 lists court from which committed by current institution. At the right of the banner is an indicator of the length of the table. Table 1 has 2 pages.
3. Directly beneath the banner are the labels for the column categories: Walpole, Norfolk, Forestry, etc.
4. The category contract houses includes those pre-release facilities which are under contract to the Department. These facilities are Charlotte House, Roxbury Multi-Service Center, Brooke House, Coolidge House and Temporary Housing Program. These last three are operated by the Mass. Halfway Houses, Inc.
5. The category Bridgewater does not include all the residents of that facility, rather it refers to those persons under criminal rather than civil commitment. These include transfers to Bridgewater from other MCI's.
6. Down the left side of the table are the labels for the row categories. (E.g. in Table 1 Barnstable, Berkshire and so on.)
7. Across the bottom of the table on the second page, are the column totals and the percentage that each column represents of the grand total which is in the lower right hand corner. In Table 1 the Walpole column total is 461 which is 25.6 of the grand total of 1798.
8. Down the right hand side of the table are row totals and the percentage that each row represents of the total. In Table 1 the Barnstable row total is 24 or 1.3 of the grand total of 1798.

9. At the very bottom of the table is the number of missing observations. This figure represents the number of cases for whom information was unknown. For Table 1 the unknowns total 408. This number of unknowns is not included in the table nor in the calculation of percentages. Thus the grand total may be described as the known total.
10. The cells in the table contain the count and the column percentage for the intersection of each row and column. In Table 1, the intersection of the Walpole column and the Suffolk row we find that 203 or 44 of 461 residents at Walpole for whom data is available are from Suffolk Superior Court.

To avoid problems due to definitional interpretations a glossary is included at the end of this report.
