A DESCRIPTION OF THE RESIDENTS OF MASSACHUSETTS
CORRECTIONAL INSTITUTIONS ON JANUARY 1, 1974

Massachusetts Department of Correction

Frank A. Hall
Commissioner

June, 1974

Produced by:

Correction/Parole Information
System Unit

Division of Research and Planning

The tables which follow describe the populations of the Massachusetts Correctional Institutions (MCI's) at the beginning of 1974. They are derived from a computerized data base developed by the Correction/Parole Information System Project.

The primary function of this report is to serve as a reference document answering specific questions about the current populations of the MCI's. For example: How many residents are from the Boston area? How many Concord men were committed for drug offenses? How many Norfolk men are beyond their first parole eligibility date? The secondary function of the report is to serve as an educational tool giving a summary description of the population of the whole Department, and of each institution.

Separate columns of the tables in the report describe the population of each MCI, and of the total. Residents of Bridgewater are excluded, with the exception of those committed to Walpole, Concord or Framingham and then transferred to Bridgewater.

The report is in most respects identical to a previous report describing the characteristics of the population at the beginning of 1973. Because of increased demand for information concerning offenses and Last Civilian Address before commitment, additional tables have been added to this year's report. Table 4A describing the most serious offense has been augmented by Table A4A describing the incidence of different charges (since residents are frequently committed on several charges beyond the most serious one) and by Table A4B describing the numbers of 2/3rd's offenders. The Last Civilian Address before commitment has been described in terms of a variety of geographical units.

The specific tables contained in the report are as follows:

PAGE NUMBER

VARIABLES

4	A. <u>Commitment Variables</u>

The reader attempting to use this document may be uncertain of the meaning of particular variables, or of the categories of these variables. A glossary is therefore included at the end of the report, and the reader is advised to turn to it in the event of such uncertainties.

Finally, while statistical reports such as the present one can answer certain basic questions, it should be emphasized that the computerized data base is designed to respond to a variety of other information requests, and that we strongly encourage such requests.

5. *Explain the difference between a "strong" and a "weak" form of a vowel.*
 A strong form of a vowel is one that is pronounced with a full, clear sound, while a weak form is a reduced or shortened version of the same vowel sound.

Figure 1 is a line graph showing the percentage of respondents who believe that the use of force is justified in various circumstances. The x-axis represents the percentage of respondents who believe that the use of force is justified (0 to 100). The y-axis represents the percentage of respondents who believe that the use of force is justified (0 to 100). The graph shows a very high percentage of respondents (around 90%) who believe that the use of force is justified in all circumstances.
