Abstract

This report presents recidivism rates of offenders released from Department of Correction facilities during 1990. Some highlights from this report are

- The recidivism rate for 1990 is 29%, a 2% increase from the rate for 1989 (27%).
- The number of releases increased from 3,361 in 1989 to 3,593 in 1990, an increase of 7%.
- The recidivism rate varies by security level of the institution from which the offender was released: 53% for maximum, 35% for medium, 33% for minimum, 21% for minimum/pre-release, 22% for state pre-release and 22% for contract pre-release.
- From 1989 to 1990 the recidivism rate for releases from maximum or medium security institutions remained at 36%, while the recidivism rate for releases from lower security facilities increased from 19% to 23%.
- The recidivism rate for males is 32%, an increase from the 1989 figure of 29%; and the rate for females is 20%, a decrease from the 1989 figure of 23%.
- Among males, the recidivism rate is 32% for those serving Cedar Junction/State Prison sentences (compared to 30% for 1989), 39% for those serving Concord/Reformatory sentences (compared to 35% for 1989), and remains at 9% for inmates who transferred to the DOC subsequent to a commitment to a county or out-of-state facility.
- Seventy-five percent of the recidivists are parole violators: 23% for technical parole violations and 52% for parole violations involving a new arrest. The other reasons that offenders returned to custody are reincarceration for a new sentence (23%) probation violations (2%) and to await trial for a new offense (less than 1%).
- Offenders released by parole have a higher recidivism rate (38%) than those who were released by a discharge or expiration of sentence (16%).
- Offenders who were paroled following a parole violation have a higher rate of recidivism (68%) than those who were first releases (19%). Likewise, offenders who were discharged following a parole violation have a higher rate of recidivism (24%) than those who were first releases (14%).
- Offenders committed for property offenses and person offenses have the highest recidivism rates (37% for both categories).
- The recidivism rate for releases with no prior adult incarcerations is lower (22%) than for releases with a history of one (32%) or more than one (41%) prior adult incarceration.
- The recidivism rate for offenders with earned furloughs prior to release (18%) is lower than the recidivism rates for offenders with no furloughs prior to release (29%) and for offenders with only emergency escorted furloughs prior to release (39%).

I. Introduction

This report presents a statistical description of offenders released to the street from Massachusetts Department of Correction (DOC) facilities during 1990 with corresponding recidivism rates. Recidivism statistics are presented by the security level of the facility from which the offender was released. The maximum security facility is Cedar Junction. The medium security facilities are Boston Correctional Center, Massachusetts Correctional Institution (MCI)-Concord, MCI-Framingham, MCI-Norfolk, North Central Correctional Institution, Old Colony Correctional Center, and Southeastern Correction Center-Medium. The minimum security facilities are Bay State Correctional Center, Northeastern Correctional Center, and Southeastern Correctional Center-Minimum.¹ The facilities which combine minimum and pre-release populations are MCI-Lancaster, MCI-Shirley, Hodder House, MCI-Plymouth, Pondville Correctional Center, MCI-Warwick, and Longwood Treatment Center. The pre-release facilities include state and contract pre-release facilities. The state pre-release facilities are Boston State Pre-Release Center (PRC), South Middlesex PRC, and Park Drive PRC. The contract pre-release facilities are Another Chance, Brooke House, Charlotte House, Faith House, Griffin House, Hillside Pre-Release Center, Houston House, McGrath House, Meridian House, Metro Day Reporting Center, and Temporary Housing Program.

Information contained in this report includes recidivism rates with regard to release variables, nature of present offense, personal background, criminal history, furlough participation, and release follow-up variables. Each table contains two types of information: (1) statistical data describing characteristics of offenders released from each security level during 1990; and (2) the recidivism rates for each of the categories of statistical data for these offenders.

¹ SECC contains both medium security and minimum security. Of the 304 releases from SECC during 1990, 254 were from SECC-Medium and 50 were from SECC-Minimum. In the tables that follow, the releases from SECC-Minimum are included in the "Minimum" column and the releases from SECC-Medium are included in the "Medium" column.

There are two main sections in this report. Section One discusses selected variables in relation to recidivism rates. Some comparisons are made between 1989 and 1990 rates. Section Two consists solely of statistical tables. When examining the tables, the reader should note the following: (1) the release population is divided according to the security level from which the offender was released; (2) N represents the number of releases who fall into the corresponding category in the table; (3) Rec represents the number of releases who are recidivists; and (4) Rate (Recidivism Rate) represents the percentage of releases in that category who have recidivated. For example, upon referring to the first table on page 20, the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the number of releases broken down by the security level of the releasing institution is presented horizontally; (2) the number of releases by type of release (parole, and discharge/expiration) is presented vertically; (3) of the 3,593 releases during 1990, 2,161 were released on parole, 1,432 were released by certificate of discharge or by expiration of sentence; and (4) of the parole releases, 821 were recidivists, yielding a recidivism rate of 38%.

II. Method

During 1990, there were 3,593 releases from DOC facilities where the offender had been incarcerated in the DOC for at least 30 days. This included 2,815 males and 778 females. Any release of an offender who was incarcerated for less than 30 days or where the release was not to the community (i.e., released to a new sentence at a State, Federal or county facility, or released to and held on a warrant) was excluded from the sample. In the case of inmates transferred from houses of correction to Longwood Treatment Center, the time spent in county facilities was counted toward the 30 days. An analysis of the cases excluded from the sample appears in Section VI, Technical Notes. The follow-up period is one year from the date of the offender's release to the

community. A recidivist is defined as any release who returns to a state or federal correctional institution, or to a house of correction or jail during the follow-up period for 30 days or more. This includes parole violators as well as offenders sentenced for new crimes.²

III. Section One: 1990 Recidivism Rates

There were 3,593 releases to the street from the DOC during 1990. Of these, 1054 offenders returned to custody during the one year period following their release date, yielding a recidivism rate of 29%.

Type of Return

Table 1 and Figure 1 present the distribution of types of return for recidivists. Recidivists were returned for a variety of reasons: 23% for technical parole violations, 52% for parole violations involving an arrest for a new offense, 23% for commitments to a county house of correction or a DOC facility to serve a new sentence, 2% for violations of probation, and fewer than one percent were held in jail to await trial on a new offense.

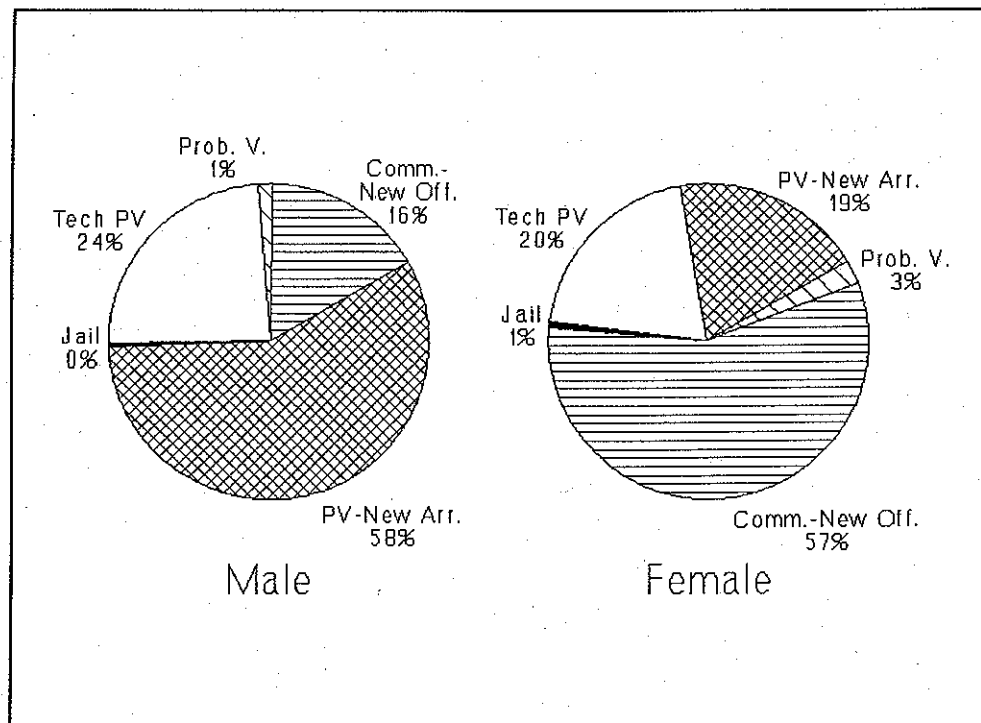

The proportions within these categories differ for male offenders and for female offenders. For males, 24% returned for technical parole violations, 58% returned for parole violations that involved a new arrest, 16% returned as commitments for new sentences, one percent returned to custody for probation violations, and less than one percent were in jail to await trial on a new offense.

² Recidivism data were collected and coded for this study by Barbara Hartwell, Lynn Aquino, Susan Brown, Matthew Kern and Kerri Spillane. The author also acknowledges Betty Chow's patience while typing numerous revisions of this report, Ramon Raagas for his contributions to the presentation of this report, and Sharon Holliday for her clerical assistance.

Table 1.
Type of Return by Sex of Recidivist

Type of Return	Male		Female		Total	
	N	%	N	%	N	%
Parole Violation - Technical	215	(24)	32	(20)	247	(23)
Parole Violation - New Arrest	517	(58)	31	(19)	548	(52)
Commitment - HOC	88	(10)	8	(5)	96	(9)
Commitment - DOC	59	(7)	83	(52)	142	(13)
Jail - Awaiting Trial	3	(0)	1	(1)	4	(0)
Probation Violation - Technical	3	(0)	0	(0)	3	(0)
Probation Violation - New Arrest	10	(1)	4	(3)	14	(1)
Total	895	(100)	159	(100)	1054	(100)

Figure 1

For females, 20% returned for technical parole violations, 19% returned for parole violations that involved a new arrest, 57% were returned as commitments for new sentences, three percent returned to custody for probation violations, and less than one percent were in jail to await trial on a new offense.

Time Until Return

Table 2 and Figure 2 presents time until return by sex of the recidivist. Of the 1054 recidivists, 56% returned to custody within 6 months of their release, 24% between 6 and 9 months, and 20% between 9 months and 1 year.

For males, 6% returned to custody within one month following their release, 20% between 1 and 3 months, 29% between 3 and 6 months, 24% between 6 and 9 months, and 20% between 9 months and one year after their release. This is similar for females, where 10% returned to custody within one month of release, 19% between 1 and 3 months, 32% between 3 and 6 months, 21% between 6 and 9 months, and 18% between 9 months and one year after their release.

Institution Released From

Table 3 shows the recidivism rate by institution and security level of the institution from which the inmate was released.³ Figure 3 presents a graph which shows the numbers of releases and recidivists by security level. Releases from maximum security had a recidivism rate of 53%. Recidivism rates were lower for releases from medium security (35%) and releases from lower security facilities: minimum (33%), minimum/pre-release (21%), state pre-release (22%), and contract pre-release (22%).

³ Releases from Lemuel Shattuck Hospital are included in the following tables as releases from the institution they were in prior to placement at the hospital.

Table 2.
Time Until Return by Sex of Recidivist

Time Until Return	Male		Female		Total	
	N	%	N	%	N	%

Figure 3
Numbers of Releases and Recidivists by Security Level of Release

Compared to recidivism rates for 1989 releases, the 1990 recidivism rates for releases from medium security institutions remained the same at 35%. State pre-release is the only security level category where the recidivism rate decreased. For releases from state pre-release facilities during 1989, the recidivism rate was 24%, while the figure for releases during 1990 is 22%. The recidivism rates for releases from the four other security levels show increases in 1990: For releases from maximum security the change is from 46% to 53%, for minimum the change is from 26% to 33%, for minimum pre-release the change is from 18% to 21%, and for contract pre-release the change is from 16% to 22%.

Furlough Program Participation

The two types of furloughs that may be granted to inmates are earned furloughs and emergency escorted furloughs. An earned furlough is an "extension of the limits of the place of confinement" for a trustworthy resident.⁴ An emergency escorted furlough is distinguished from an earned furlough by the fact that emergency escorted furloughs require that the inmate must be accompanied by correctional staff throughout the furlough, while an earned furlough is unescorted.

Of the 3,593 offenders released during 1990, 287 (8%) received a furlough prior to release: 142 (4%) received at least one earned furlough, and 145 (4%) received emergency escorted furloughs only. Table 4 shows that the recidivism rate is substantially lower for releases with at least one earned furlough (18%) than it is for releases who received no furloughs (29%) and releases who had emergency escorted furloughs only (39%).

⁴ 103 CMR 463 Furloughs.

Grand Total	1709	622	36%	1884	432	23%	3593	29%

The recidivism rate also varies by the security level of the releasing institution. Offenders released from maximum or medium security with at least one earned furlough during their incarceration have a recidivism rate of 43%, while offenders released from lower security facilities with at least one earned furlough have a recidivism rate of 14%.

When the data are disaggregated by sex, the recidivism rate for males who did not have furloughs during their incarceration is 32%, the rate is 40% for males with only emergency escorted furloughs, and 19% for males with at least one earned furlough. For females, the recidivism rate for releases who did not have any furloughs during their incarceration is 21%, while for those with emergency escorted furloughs only the rate is 27%, and it is 12% for releases with at least one earned furlough.

For both males and females, recidivism rates are found to be lower for releases from lower security facilities and for releases who had earned furloughs, while the recidivism rates for releases with only emergency escorted furloughs exceeds the recidivism rates for releases who had no furloughs while incarcerated.

Type of Release

Table 5 shows recidivism rates by type of release and security level of releasing institution. Overall, the recidivism rate is higher for those released on parole (38%) than for those who were discharged (16%). Individuals released by parole are supervised by a parole officer for a period of time following their release, whereas individuals released by expiration of sentence or certificate of discharge are not, unless they are required to serve a probation term.

The data in Table 5 show that recidivism rates vary based on whether the 1990 release is the offenders first release from the present sentence, or if the release followed a prior parole violation. For example, an offender may have been paroled and subsequently returned due to a parole violation prior to the 1990 release. First releases have consistently lower recidivism rates than parole

violators. Among parolees, the first releases have a recidivism rate of 19%, while the recidivism rate for parole violators is 68%. For offenders discharged from their sentence, the recidivism rate for first releases is 14%, while it is 24% for parole violators.

When the data are compared by security level of the releasing institution, the recidivism rate is 29% for first releases paroled from maximum or medium security institutions and 15% for first releases paroled from lower security institutions. The recidivism rate is 65% for parole violators who were paroled from maximum or medium security while it is 73% for parole violators who were paroled from lower security.

The recidivism rate for offenders released by expiration of sentence or good conduct discharge is 20% for first releases from maximum or medium security and 9% for first releases from lower security. For those who were discharged but who had a prior parole violation on the present sentence, the recidivism rate is 25% for those released from maximum or medium security and 20% for those released from lower security.

Table 6 shows recidivism rates by type of release for males and females. The overall pattern is the same as in Table 5, i.e., offenders released by parole have a higher recidivism rate than those released by expiration of sentence or good conduct discharge; and parole violators have a higher recidivism rate than first releases.

Males released by parole have a recidivism rate of 40% and males released by discharge have a recidivism rate of 16%. For both types of releases, the recidivism rates are lower for first releases than for parole violators. For females, those released by parole have a recidivism rate of 26% and those released by discharge have a recidivism rate of 16%. For female releases by parole, the recidivism rate is higher for parole violators (69%) than for first releases (11%), but for female releases by expiration or discharge the recidivism rate is higher for first releases (17%) than it is for parole violators (8%).

Offender Characteristics

Table 7 shows recidivism rates for male and female offenders by race, age at release, present offense, and prior adult incarcerations. Overall, females have a lower rate of recidivism (20%) than males (32%).

As shown in Table 7, Caucasian inmates have a recidivism rate of 26%, Hispanic inmates have a recidivism rate of 32%, and African American inmates have a recidivism rate of 36%. The patterns are different for males and females. For males, the recidivism rates for African American and Hispanic releases are 40% and 34% respectively, while the recidivism rate for Caucasian male releases is 27%. For females, the recidivism rate for Caucasian and African American releases is 20% and the recidivism rate for Hispanic releases is 22%.

The section on age at release and sex of offender shows that younger offenders generally have higher rates of recidivism than older offenders. The 21 years and younger age group have the highest recidivism rate for males (43%), while for females the age groups with the highest recidivism rates are 21 years and younger and 26 through 29 years. In both of these categories, the recidivism rate is 26%.

In terms of present offense, the recidivism rate is highest in the person offense and property offense categories (37%), followed by drug offenses (25%), sex offenses (24%) and "other" offenses (13%). For males, the offense category with the highest recidivism rate is property offenses (45%), while for females, the small number of releases incarcerated for sex offenses produced a very high recidivism rate (43%). The offense category with the second highest recidivism rate for females is property offenses (22%). "Other" offenses is the category with the lowest recidivism rate for both males (11%), and females (17%).

The final section of Table 7, recidivism by prior adult incarcerations and sex of offender, reveals a higher recidivism rate for those with a history of one or more prior adult incarcerations than for those with no prior adult incarcerations. Overall, the recidivism rate is 22% for offenders

with no prior adult incarcerations versus a 32% recidivism rate for those with one prior adult incarceration and a 41% recidivism rate for those with two or more prior adult incarcerations. For males, releases with no prior adult incarcerations have a 23% recidivism rate, while releases with one or more prior adult incarceration have higher rates (35% and 44%, respectively). For females, releases with no prior adult incarcerations have a 15% recidivism rate, while the recidivism rate for releases with one prior adult incarceration is slightly lower (12%), and releases with more than one prior adult incarceration have a 28% recidivism rate.

V. Glossary

DOC

Department of Correction

EXPIRATION

Expiration of Sentence

GCD

Good Conduct Discharge

HOC

House of Correction

OFFENSE

Manslaughter

Includes vehicular homicide.

Assault - Intent to Murder

Includes assault with intent to murder, attempted murder, and accessory to murder.

Armed Assault

Includes assault with intent to rob - being armed, armed assaults in dwelling houses, assault and battery with dangerous weapon, and assault by means of a dangerous weapon.

Unarmed Assault

Includes assaults with intent to rob - not being armed, assault, and assault and battery.

Other Person

Includes confining or putting a person in fear for the purpose of stealing, mayhem, extortion, and conspiracy.

Rape of Minor

Includes rape of person under sixteen, and rape of child.

Assault w/Intent to Rape of Minor

Includes assault on person under sixteen with intent to commit rape, and indecent assault and battery on child under 14.

Crimes Against Chastity or Morality

Includes unnatural and lascivious acts, incest, adultery, fornication, lewd lascivious cohabitation, open and gross lewdness, child pornography, indecent exposure, and other pornography or obscenities.

V. Glossary (continued)

Stolen Goods	Includes common receiver of stolen goods.
Vehicle Theft	Includes theft of a motor vehicle, and use without authority.
Other Property	Includes common and notorious thief, fraud, and malicious or wanton injuries to property.
Prostitution	Includes common night walker, deriving support from prostitute, and prostitution.
Weapons Offenses	Includes weapons offenses, and weapons violation.
Vehicle Offenses	Includes motor vehicle offenses, and leaving the scene.
Contempt of Court	Includes contempt of court, and violation of a court order/violating a restraining order.
Other	Includes nonsupport, unlawful possession of alcohol, trespassing, false alarm of fire, usury, resisting arrest, and other.
Class A	Includes possession, sale, manufacturing, distribution, dispensing of a Class A controlled substance (Heroin, Morphine) or intent to do any of the above.
Class B	Same as above, but for Class B controlled substance (Amphetamines, Barbituates, Cocaine).
Class C	Same as above, but for Class C controlled substance (LSD, Hash).
Class D	Same as above, but for Class D controlled substance (Marijuana).

V. Glossary (continued)

Class E	Same as above, but for Class E controlled substance (Prescription Drugs).

VI. Technical Notes

This study draws its cases from a cohort of offenders released to the community from the Department of Correction during 1990 by parole, good conduct discharge, or expiration of sentence. From the original data file, 495 cases were excluded for purposes of the recidivism study. There are five reasons why cases were excluded: 1) an error in the data file, i.e., the person was not released or the release was not a parole, expiration, or discharge; 2) the offender was not released to the community but released to a from and after sentence or warrant; 3) the offender served less than 30 days in custody prior to release; 4) the offender died within 1 year of release; or 5) the offender was released to an immigration detainer or was deported.

It should be noted that in calculating time served, the day the person started serving their sentence and the day of release were both credited toward time served. For all releases serving their first period of incarceration in a DOC facility, time served starts on the day committed to the DOC and does not credit any time served in a jail, house of correction, or other correctional facility prior to commitment.

Table 8 shows an analysis of cases excluded from the study: 35% were cases where time served was less than 30 days; 12% were because the release was not to the community; 50% were due to data errors in the release file; 2% were dropped because the release was to an Immigration & Naturalization Service (INS) detainer, and less than 1% were dropped due to death of the releasee.

Due to the large proportion of females that were excluded from the analysis because their time served was less than 30 days, a subsequent analysis was conducted to determine what impact the inclusion of these cases might have on recidivism rates.

Follow-up information was collected on the 166 females. Twenty-nine of the cases were reincarcerated for 30 days or more within a year of their release. Table 9 shows that if these cases had been included in the study, the overall recidivism rate would remain at 29%, and the recidivism rate for females would remain at 20%.

Table 8.

Reason for Exclusion by Commitment Institution,
1990 Releases

Reason for Exclusion	Commitment Institution				Total
	Cedar Junction	Concord	Framingham	Other Jurisdiction	
Release File Error (Release was from detainee, Release was from Bridgewater, Not Released or Wrong type)	123	110	11	4	248
Not Released to Community (F+A, Warrant)	13	15	31	0	59
Served Less than 30 Days	5	3	166	0	174
Died Within 1 Year of Release	0	2	0	0	2
Release to Immigration Detainer or Deported	8	4	0	0	12
Total	149	134	208	4	495

Table 9.

Recidivism Rates Including Females Where
Time Served is Less than 30 Days

Sex of Offender	30 Days or More			Less than 30 Days			Total
