## INTRODUCTION

This report is a statistical description of the characteristics of releases to the street from the Massachusetts Department of Correction during 1977. The tables which follow contain information on present offense variables, personal background characteristics, criminal history variables, furlough participation and release variables for all inmates released to the streets from Massachusetts Correctional Institutions. These tables were derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and produced by the Research Unit of the Department of Correction on the Massachusetts State College Computer Network (MSCCN).

In reading the tables in this report the reader should note the following: (1) the releasee population is divided according to institution released from, (2) the top number in each cell represents the number of individuals who fall in the corresponding category in the table, and (3) the bottom number in each cell represents the percentage of the number of individuals in a particular category to the total number of releases from that institution (column percents). This report is divided into 2 sections. The first section lists the specific non-pre-release institutions and combines the pre-release facilities into one category. The second section lists the specific pre-release facilities and combines the non-pre-release institutions into one category. For example upon referring to Table I on page 4, court from which committed is presented and the following types of information can be obtained:

- (1) The total number of individuals broken down by institution released from is presented horizontally across the head of the table.
- (2) The specific courts are labeled and presented vertically.
- (3) Of the 1193 individuals released during 1977, 126 were released from MCI Walpole.
- (4) Of the 126 releases from Walpole 4 (3%) were originally committed from Barnstable Superior Court.
