

Statistical Tables Describing the Background Characteristics  
and Recidivism Rates for Releases From  
Massachusetts Correctional Institutions  
During 1981

Massachusetts Department of Correction

Michael V. Fair  
Commissioner

December, 1983

PUBLICATION #13472

Approved By Daniel Carter, State Purchasing Agent

### Introduction

The following research report is a statistical description of characteristics of offenders released to the streets from Massachusetts correctional institutions during 1981 with corresponding recidivism rates. For the purposes of this report, all drug programs and pre-release facilities are collapsed into the category "pre-release". A subsequent report will provide the information for all the specific individual pre-release facilities. The statistics are available for men released from MCI's Walpole, Concord, Framingham, Gardner, Norfolk, SECC (Southeastern Correctional Center), Minimum Security (Northeastern Correctional Center, Bay State Correctional Center, Plymouth, and Warwick), four drug programs (Spectrum House, Meridian, Boston VA Hospital, and Third Nail, thirteen pre-release centers (577 House, 699 House, Temporary Housing, Shirley, Boston State, Coolidge, Brooke, South Middlesex Pre-Release, Park Drive, Lancaster, Charlotte House, Hillside, and Norfolk Pre-Release), and two other facilities (Lemuel Shattuck Hospital and Bridgewater State Hospital). Statistics are also

available for women released from MCI-Framingham, and three pre-release centers (Charlotte House, Brooke House, and Lancaster). A total of 1,032 offenders (837 males and 195 females) were released from the correctional facilities listed above. The follow-up period is one year from the date of the offender's release to the community. A recidivist is defined as any offender who returns to a state or federal correctional institution, or to a house of correction or jail for 30 days or more.

Information contained in this report includes statistics on recidivism rates associated with individual characteristics with regard to release variables, nature of present offense variables, personal background variables, criminal history variables, furlough participation variables, and release follow-up variables. The tables which follow contain two types of information, (1) statistical data describing characteristics of offenders released from each institution during 1981, and (2) the rates of recidivism cross tabulated with each of the categories of the statistical data for these offenders.

In reading tables in this report, the reader should note the following: (1) the release population is divided according to the institution of release. (2) N represents the number of offenders who fall into the corresponding category in the table. (3) P represents the percentage of the number of offenders in a particular category to the number of offenders released from that institution (column percents). (4) RR (Recidivism Rate) represents the rate of recidivism of the number of offenders in that category who have recidivated. For example, upon referring to the first table on page 9, the variable "Type of Release" is presented and the following kinds of information may be obtained: (1) the total number of releases broken down by the specific institution

is labeled and presented horizontally across the head of the table; (2) the type of release (parole or discharge) is labeled and presented vertically; (3) of the 1032 released during 1981, 816 were released on parole (79%) and 216 were released on a discharge (21%); (4) those offenders released from Walpole who were released on parole had a recidivism rate of 36% whereas those offenders released from Walpole on a discharge had a recidivism rate of 35%.

The material was derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and was produced on the Massachusetts State College Computer Network (MSCCN).
