INTRODUCTION

This report is a statistical description of characteristics of the residents in each correctional facility as of January 1, 1980. This point in-time profile contains information on present offense variables, personal background characteristics, criminal history and furlough participation. The tables were derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and produced by the Research Unit on the Massachusetts State College Computer Network (MSCCN).

In reading the tables in this report, the reader should note the following: (1) the population as of January 1, 1980 is divided according to institution of residence, (2) the top number in each cell represents the number of individuals who fell in the corresponding category in the table, and (3) the bottom number in each cell represents the percentage of the number of individuals in a particular category to the total number of residents in that institution (column percentages). The report is divided into two sections. Section I lists the specific non-pre-release institutions and combines the pre-release institutions into one column. The second section lists the specific pre-release institutions and combines the non-pre-release institutions into one column. For example, upon referring to Table III on page Committing Institution is presented and the following type of information can be obtained:

- (1) The total number of individuals broken down by institution of residence is presented horizontally across the head of the table.
- (2) The specific committing institution is labeled and presented vertically.
- (3) Of the 2754 residents on January 1, 1980, 634 residing in MCI Walpole.
- (4) Of the 634 residents of Walpole, 567 (89%) were originally committed to Walpole.

The number of individuals in the report does not include patients at Bridgewater State Hospital nor individuals awaiting trial.

SUMMARY OF STATISTICS

On January 1, 1980, there were 2754 individuals incarcerated in the state correctional system.

Nature of Present Offense

Institution of Residence. Two institutions house half of the inmate population. Approximately one-quarter of the population (23%) is housed in Walpole, the primary maximum security facility and over one-quarter (27%) is housed at Norfolk, a medium security institution. The pre-release population decreased from 12% in January 1, 1979 to 11% on January 1, 1980.

Sentencing Courts. Half of the residents in institutions as of January 1, 1980 were sentenced in two of the Superior Courts - Suffolk (35%) and Middlesex (15%).

Jail Credits. More than fifty percent of the population spent 51 days or more in jail while awaiting trial.

Commitment Institutions. The majority of residents (76%) were committed to Walpole.

Sentence. Over half of the residents (53%) are serving a minimum sentence of seven years or more while the rest are serving minimum sentences of less than seven years or indeterminate sentences. Sixteen percent are lifers and one individual is serving a death sentence.

Offense. The majority of residents (69%) are serving sentences for offenses versus person. The most frequent offense of the current population was armed robbery (28%).

Age at Incarceration. The median age at incarceration was 24 years.

Personal Background Characteristics

Sex. The majority of the population (96%) is male.

Race. Thirty-six percent of the residents are black; 3% are hispanic, 62% are white, and there is one Native American and one Asiatic in the system.

¹ The number of individuals in the report does not include patients at Bridgewater State Hospital nor individuals awaiting trial.

Marital Status. Over half of the population (59%) is single.

Military Discharge. The majority (73%) did not serve in the military.

Prior Address. The majority of residents (56%) came from the greater Boston SMSA.

Occupation. Most of the residents (76%) held manual or service jobs prior to their incarceration.

Education. The median educational level was tenth grade; 26% were high school graduates or had received their graduate equivalency diploma; and 1% were college graduates.

Criminal History

Prior Arrests. The median age at first arrest was sixteen years. Nearly half (48%) of the residents had 12 or more prior court appearances.

A majority of residents had prior arrests for offenses vs. person (91%) and for property offenses (87%). A minority of residents had prior arrests for sex offenses (21%) for drug offenses (45%) for drunkenness offenses (23%) and for escape offenses (6%).

Prior Incarcerations. Twenty-one percent had been incarcerated as juveniles; 60% had prior incarcerations at a house of correction; and 32% had prior incarcerations in state or federal correctional institutions.

Overall, 74% had served time in some type of correctional facility and 48% had served some time as an adult.

Furlough Variables. Most inmates (72%) continue not to receive furloughs; only 4% had a "Late Under" furlough outcome and only four individuals (.1%) escaped while on a furlough.

A late under furlough outcome is one in which an individual returns within 2 hours after the designated time of return.
