## INTRODUCTION

The following report is a brief description of commitments to Massachusetts houses of correction (county facilities) for 1973, 1974 and 1975. Included is information regarding present offense, sentence, month committed, age at incarceration, sex, and marital status. These tables were derived from data collected by the data processing unit of the Research Division, and produced by the Research Unit on the Massachusetts State College Computer Network.

- NOTES: (1) Commitments to county facilities may not exceed two and one-half (2-1/2) years.
  - (2) Each institution includes both house of correction and jail except for Suffolk County. Deer Island is the Suffolk County House of Correction and Charles Street is the Suffolk County Jail.
  - (3) In 1975 the Correction and Parole Management Information System changed its coding procedure for the offense variable. Steps were taken to make these 2 systems as compatible as possible, however, certain instances prevented these 2 systems from being completely uniform. Therefore, the reader should be aware of the following:
    - (a) In the property offense categories, there are no breakdowns of types of burglary, stealing, common theft and fraud.
    - (b) There is no breakdown of drug offenses and there are fewer sex offense categories.
    - (c) No codes existed for stubborn child, pimping, prostitution, illegitimacy, bribery, and abortion.
  - (4) It appears that coders coded "operating a motor vehicle under the influence of alcohol" under "drunkenness" for 1974 and 1975.

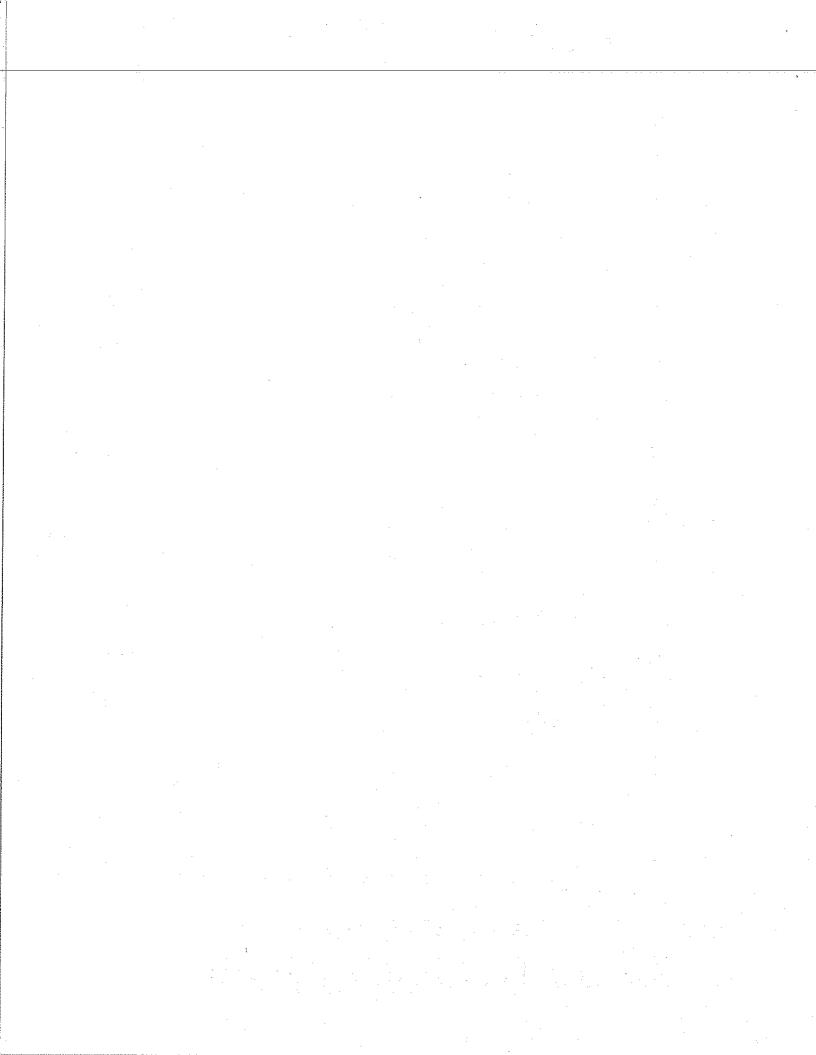

## EXPLANATION OF TABLES

Each table is subdivided by the institution committed to. Each cell in a table contains 2 numbers. The top number is the <u>number</u> of inmates who fall into the corresponding category. The bottom number (in parentheses) is the percent or proportion of the number of individuals in a particular category to the total number of commitments from that institution (i.e., column percent). For example in reading the 1st table, the variable, "month committed" is presented and the following information can be found: the total commitment sample of all individuals has been broken down according to the institution from which they were committed. This is labeled and presented horizontally across the head of the table. The month committed is labeled and presented vertically. Of the 4,175 individuals committed during 1973, 744 were committed to Billerica. Of the 744 individuals committed to Billerica 93 (13%) were committed in January.
