INTRODUCTION

This report is a statistical description of characteristics of the inmates in each correctional facility on January 1, 1978. This point-in-time profile contains information on present offense variables, personal background characteristics, criminal history and furlough participation. The tables which follow were derived from the computerized data base developed by the Correction and Parole Management Information System (CAPMIS) and produced by the Research Unit on the Massachusetts State College Computer Network (MSCCN).

In reading the tables in this report the reader should note the following: (1) the inmate population on January 1, 1978 is divided according to institution of residence, (2) the top number in each cell represents the number of individuals who fell in the corresponding category in the table, and (3) the bottom number in each cell represents the percentage of the number of individuals in a particular category to the total number of residents in that institution (column percents). The report is divided into two sections. Section I lists the specific non-pre-release institutions and combines the pre-release institutions. The second section lists the specific pre-release institutions and combines the non-pre-release institutions. For example, upon referring to Table I on page 4 obtained.

- (1) The total number of individuals broken down by institution of residence is presented horizontally across the head of the table.
- (2) The specific courts are labeled and presented vertically.
- (3) Of the 2,750 residents on January 1, 1978, 668 were residing in MCI-Walpole.
- Of the 668 residents of Walpole, 10 (1%) were originally committed from Barnstable Superior Court.

The number of individuals in the report does not include patients at Bridgewater State Hospital nor individuals awaiting trial.
